

paper love

Every now and then, we come across a wedding with such extraordinary styling that we are completely captivated, and utterly inspired – and we just have to share a sneak peek with you! In this wedding hundreds of beautifully coloured paper balls were suspended from the ceiling and delicate paper flowers adorned the walls and doorways to create a truly magical space for the couple and their guests.

Never have we seen paper used to such effect, and with such style!

You can see more of the extraordinary styling from this beautiful wedding in Real Weddings Style 2010/2011, out in September!
